

ID	2394
Curricular Unit	Methodology of Training in Rehabilitation
Regent	Francisco José Bessone Ferreira Alves
Learning Outcomes	To discuss methodology of training as a means of rehabilitation of the injured athlete or recreational sportsmen/women. To discuss the influence of exercise on the general health, considering the beneficial role of exercise in different health conditions. To provide the basic principles of training methods in health and disease and to review the training methods in a clinical context
Syllabus	Aerobic training methods, Anaerobic training methods, Strength training methods, Cardiovascular responses, Neuromuscular responses, Exercise and health, Prevention of disease, Epidemiological considerations, Assessment of health parameters, Intervention studies
Evaluation	Written exam
