

<b>ID</b>	2948
<b>Curricular Unit</b>	Mathematics I
<b>Regent</b>	Maria de Fátima Fabião Ribeiro
<b>Learning Outcomes</b>	Introduction to calculus in R and applications.
<b>Syllabus</b>	<ol style="list-style-type: none"><li>1. A few aspects of logic and set theory.</li><li>2. The real number system.</li><li>3. Infinite sequences. Series.</li><li>4. Functions of one variable: limits and continuity.</li><li>5. Differential calculus of real valued functions.</li><li>6. Single variable optimization.</li><li>7. Integral calculus.</li></ol>
<b>Evaluation</b>	Progressive learning of mathematical topics. Final exam.
<b>Bibliography</b>	Sydsaeter, Knut and Peter Hammond, Essential Mathematics for Economic Analysis, FT Prentice Hall, 2008.
