

ID	3396
Curricular Unit	Planning and Project Management
Regent	Carlos Jorge Pinheiro Colaço
Learning Outcomes	<ol style="list-style-type: none"> 1. Macroergonomics knowledge of the underlying theoretical concepts. 2. Application domain methods of analysis macroergonomics. 3. Cost-benefit capacity of an Ergonomic Intervention.
Syllabus	<ol style="list-style-type: none"> 1 - Macroergonomics. 2 - Determining the cost-effectiveness of ergonomic intervention. 3 - Structural Dimension of Work System. 4 - Project Management Methodologies in Ergonomics. 5 - Analysis and Design of Production Processes. 6 - Analysis of Results/Benefits of Ergonomic Intervention. 7 - Examples of application of the Cost-Benefits Analysis of Ergonomic Intervention in the Activity Sectors.
Evaluation	<p>Continuous assessment:</p> <p>Theoretical-component - perform a written test. The test has a minimum grade of 9.5.</p> <p>Practical component - perform a written work, with a minimum rating of 9.5.</p> <p>The note of this component is 30% of the final mark of the course.</p> <p>Final evaluation:</p> <p>Conducting an examination consisting of a written, practical and oral test.</p> <p>To access the oral exam the student is required to obtain the written evidence and practice a minimum grade of 9.5 values.</p>
