

ID	3396
Curricular Unit	Planning and Project Management
Regent	Carlos Jorge Pinheiro Colaço
Learning Outcomes	 Macroergonomics knowledge of the underlying theoretical concepts. Application domain methods of analysis macroergonomics. Cost-benefit capacity of an Ergonomic Intervention.
Syllabus	 1 - Macroergonomics. 2 - Determining the cost-effectiveness of ergonomic intervention. 3 - Structural Dimension of Work System. 4 - Project Management Methodologies in Ergonomics. 5 - Analysis and Design of Production Processes. 6 - Analysis of Results/Benefits of Ergonomic Intervention. 7 - Examples of application of the Cost-Benefits Analysis of Ergonomic Intervention in the Activity Sectors.
Evaluation	Continuous assessment: Theoretical-component – perform a written test. The test has a minimum grade of 9.5. Practical component – perform a written work, with a minimum rating of 9.5. The note of this component is 30% of the final mark of the course. Final evaluation: Conducting an examination consisting of a written, practical and oral test. To access the oral exam the student is required to obtain the written evidence and practice a minimum grade of 9.5 values.
