

<b>ID</b>	3533
<b>Curricular Unit</b>	Dissertation
<b>Regent</b>	Pedro Jorge Amaral Melo Teixeira
<b>Learning Outcomes</b>	The purpose of the Dissertation is to develop introductory level skills and knowledge to produce scientific research, meant to serve as the basis for continuing into a doctorate degree.
<b>Syllabus</b>	<p>Application of the scientific method to test and solve conceptual or applied problems in the domain of exercise and health.</p> <p>Producing an original research thesis, matching the student's interests and the research lines available in the existing research groups.</p> <p>Knowing how to produce and publish scientific research.</p>
<b>Evaluation</b>	The Dissertation is conducted under the direct supervision of an academic adviser, with high levels of responsibility and autonomy of the part of the student and a high level of flexibility in its modus operandi. Regular meetings are considered essential to successfully reach the goals of the course. Final classification is subject to evaluation and public discussion by a jury selected by the school's Scientific Council. The final grade (0-20) can be reached by unanimous decision of the jury or through the average of the grades of each individual jury member.
<b>Bibliography</b>	The set according to the work plan defined by the student in collaboration with the academic advisor.
