<b>Curricular Unit</b>	Animation of Physical Activity and Sports in School
Regent	António José Mendes Rodrigues
Learning Outcomes	<ul> <li>(a) To know and describe Animation concepts in an educational context;</li> <li>(b) To know and relate the evolution of animation concepts, its variants and the dynamics of development of school and non-school education;</li> <li>(c) To know the relevance of the various processes and functions of animation in educational communities;</li> <li>(d) To relate animation and action in promoting the participation of different actors in the community;</li> <li>(e) To understand the animation of physical and sports activities in school communities as a means of reconstructing the everyday spaces of personal and social life of the school actors;</li> <li>(f) To know and use methodological tools of project conception to design, develop and evaluate projects of animation of physical and sports activities for school communities.</li> </ul>
Syllabus	The Course has three thematic blocks:  1. Animation, Socio-educational Animation, Animation of Physical and Sports Activities: from concept to practice.  (a) Historical context and genesis of the concept.  (b) Sources of animation: emergence of leisure; pedagogy of leisure; leisure and recreation; non-formal education.  (c) Different paradigms of educational entertainment: occupation of free time and recreation; global citizenship and autonomy; community projects.  (d) The specificity of the animation of physical and sports activities functions, models and aims.  2. Contexts of actors and animation processes in schools.  (a) Educational communities: actors, spaces, places and times of the animation.  (b) Dynamics and profiles of animators/educators of physical and sports activities.  (c) Different roles: animator activities; promoter of projects; promoter of programs for the school community.  3. Animation methodologies in schools: the project work.  (a) Diagnosis (ways and means).  (b) Planning (principles and methods).  (c) Implementation (activities and organization).  (d) Evaluation (processes and products).

## **Evaluation**

Continuous assessment: (a) resolution and submission of 3 questions; (b) final report of the first part of the CU [(a) 20% and (b) 20%)]; Project Design for one educational community (40%) and oral presentation to two classes (10%); Individual reflection about one of the projects of other groups (10%).

Final assessment: written exam and oral exam. The oral exam is mandatory: students will be accepted for the oral test if they obtain a rating equal to or greater than 9.5 values.
