

ID	564
Curricular Unit	Occupational Health and Safety I
Regent	Rui Miguel Bettencourt Melo
Learning Outcomes	<p>Students should:</p> <ul style="list-style-type: none"> - demonstrate an understanding of the importance of occupational health and safety (OHS) principles and practice in the prevention of workplace accidents and diseases; - acquire practical knowledge of the OHS laws and standards; - identify and use the basic concepts of OHS in risk management; - identify the factors that contribute to electrical, explosion and fire risks, and propose and evaluate control strategies.
Syllabus	<p>Occupational Health and Safety (OHS) fundamentals National and European regulations on OHS Organization of OHS activities within the enterprises Workplace accident causes Workplace accident statistics Safety signals Personal protective equipment Fire safety Electrical safety</p>
Evaluation	<p>The presentation and discussion of the theoretical aspects of the syllabus relies on PowerPoint presentations and videos. Practical classes involve the resolution of specific problems concerning most syllabus issues and sometimes real life situations.</p> <p>Students are expected to complete an essay assignment (30% weighting), within the scope of the syllabus, present it in class and take 2 written tests (70% weighting). Alternatively, a final exam is also available.</p>
